Pawfect Parents: player decision tree

Every action a player can take in Levels 1 to 3, what the game says or shows in reply, and the learning objective each reply serves. The dog is called Biscuit here; in the game it is the name the player chose. Built from the game's own text, so it matches what players see.

Scene or cutscene · Decision point · Player action · Good outcome · Wrong outcome · Information / neutral · Game rule (dashed) · Click a box with a + or – to open or close its branches.

How a play-through flows

Click a step to jump to its decision tree. Each tree reads from left to right: a decision point, what the player can do, and what the game says back, with the learning objective (LO) each answer serves.

Generated 2026-11-12 by tools/decision_tree/build.mjs from src/content.js (180 boxes). Learning objectives are defined in GAME_DESIGN.md section 1.2. Meter changes are in points on a 0 to 100 scale.

Start: level select, the story and the dog CTX

Title, then a cork-board level select (every level is open). Level 1's story names the puppy halfway through; Levels 2 and 3 ask for a dog first if none was adopted yet.

Level 1, Task 1: Snack Time LO1

Good food or bad food. Three rounds, each a safe food against an unsafe one. A right pick is rewarded and explained; a wrong pick is a gentle nudge with a safety fact, never a punishment.

DECISION **Start of the task**
Every line is in a dialogue box that blocks the game until OK. The first time, a ghost-hand demo shows the move; the ? button replays it. A yellow arrow points at the counter. Meter drain: 0.25 per second.
> **PARENT**
> "Biscuit's hungry! Tap the kitchen counter to see what we have."

LO1

PLAYER DOES **Tap the counter**

DECISION **Counter close-up: three rounds**
The first time, a demo shows tapping a food. All three rounds must be right to finish.
LO1

DECISION
Round 1 of 3: Puppy kibble or Chocolate bar
The two foods sit on wooden boards; which side each is on is random. Hovering a food outlines it.
LO1

PLAYER DOES **Pick Puppy kibble**

RESULT **Safe pick** **+20 meter**
The puppy walks to its bowl, sniffs, eats, then wags and a heart floats up.
> **PARENT**
> "Biscuit is hungry again! Tap the counter. Which food is safe this time?"

> **DID YOU KNOW?**
> Puppy kibble has everything a growing puppy needs.

Next: round 2.
LO1

PLAYER DOES **Pick Chocolate bar**

RESULT **Unsafe pick** **−5 meter**
The puppy sniffs, refuses, and shows a tummy-ache thought bubble. The dog never eats the unsafe food.
> **PARENT**
> "Good thing Biscuit didn't eat it. I'll put that up high where they can't reach."

> **PARENT**
> "Look again at both foods. Which one is safe for Biscuit?"

> **DID YOU KNOW?**
> Chocolate contains theobromine, which dogs can't break down. Even a little can make them very sick.

The parent puts it up in the high cupboard (safe storage). The same pair comes back with the sides swapped. A card is never shown twice.
LO1

DECISION
Round 2 of 3: Carrot sticks or Grapes
The two foods sit on wooden boards; which side each is on is random. Hovering a food outlines it.
LO1

PLAYER DOES **Pick Carrot sticks**

RESULT **Safe pick** **+20 meter**
The puppy walks to its bowl, sniffs, eats, then wags and a heart floats up.
> **PARENT**
> "One more snack! Tap the counter and choose carefully."

> **DID YOU KNOW?**
> Carrots are a crunchy, healthy snack for dogs.

Next: round 3.
LO1

PLAYER DOES **Pick Grapes**

RESULT **Unsafe pick** **−5 meter**
The puppy sniffs, refuses, and shows a tummy-ache thought bubble. The dog never eats the unsafe food.
> **PARENT**
> "Good thing Biscuit didn't eat it. I'll put that up high where they can't reach."

> **PARENT**
> "Look again at both foods. Which one is safe for Biscuit?"

> **DID YOU KNOW?**
> Grapes and raisins can hurt a dog's kidneys, even in small amounts.

The parent puts it up in the high cupboard (safe storage). The same pair comes back with the sides swapped. A card is never shown twice.
LO1

DECISION
Round 3 of 3: Cooked chicken or Red onion
The two foods sit on wooden boards; which side each is on is random. Hovering a food outlines it.
LO1

PLAYER DOES **Pick Cooked chicken**

RESULT **Safe pick** **+20 meter**
The puppy walks to its bowl, sniffs, eats, then wags and a heart floats up.
> **PARENT**
> "Great choices! Biscuit has a happy tummy. Time to play!"

> **DID YOU KNOW?**
> Cooked chicken is a safe treat. Take the meat off the bone first, and skip the skin and seasoning.

Last round: the "Later that afternoon" cutscene, then Potty Training.
LO1

PLAYER DOES **Pick Red onion**

RESULT **Unsafe pick** **−5 meter**
The puppy sniffs, refuses, and shows a tummy-ache thought bubble. The dog never eats the unsafe food.
> **PARENT**
> "Good thing Biscuit didn't eat it. I'll put that up high where they can't reach."

> **PARENT**
> "Look again at both foods. Which one is safe for Biscuit?"

> **DID YOU KNOW?**
> Onions and garlic harm a dog's blood, whether cooked or raw.

The parent puts it up in the high cupboard (safe storage). The same pair comes back with the sides swapped. A card is never shown twice.
LO1

PLAYER DOES
Do nothing for 15 seconds

RESULT **Idle hint**
> **PARENT (IDLE HINT)**
> "Dogs need dog food or plain, simple foods. Sweets and some fruits are dangerous."

LO1

Level 1, Task 2: Potty Training LO2 LO3

It starts with an accident: the puppy pees on the rug before the player can act. Then place the pad, read the signs, lead the puppy with a treat and reward it right away.

SCENE **"Later that afternoon" cutscene**

TIME CARD
"Later that afternoon"

PARENT
"Biscuit has had lunch and lots of play. Puppies often need to go potty after that..."

STORY
"Wait... why is Biscuit sniffing the rug like that?"

CTX LO2

DECISION
The accident (no input: the puppy sniffs, circles and pees on the rug)

PARENT
"Oh no, Biscuit had an accident on the rug! What do you do?"

LO3

- PLAYER DOES **Scold the puppy**
  - RESULT **Scolded** −5 meter
    The puppy cowers.
    DID YOU KNOW?
    Scolding teaches puppies to hide when they go, not where to go.
    LO3
- PLAYER DOES **Clean it up calmly**
  - RESULT **Calm clean-up** +10 meter
    The puddle fades away.
    DID YOU KNOW?
    Clean accidents well. Leftover smell makes a puppy go there again.
    LO3

DECISION **Part A: place the pad**

The first time, a ghost-hand demo shows the move; the ? button replays it. Three yellow arrows point at the possible spots. The pad lights up when hovered.

PARENT
"Accidents happen. Let's give Biscuit a proper potty spot."

PARENT
"Here's a potty pad. Drag it to a good spot for Biscuit."

LO2

- PLAYER DOES **Drop the pad next to the food bowl**
  - RESULT **Poor spot** −5 meter
    DID YOU KNOW?
    Dogs don't like to go potty near where they eat.
    The pad slides back and the player tries again.
    LO2
- PLAYER DOES **Drop the pad the middle of the room (the rug)**
  - RESULT **Poor spot** −5 meter
    DID YOU KNOW?
    The middle of the room is busy and stressful, so the puppy may avoid it.
    The pad slides back and the player tries again.
    LO2
- PLAYER DOES **Drop the pad the quiet corner by the garden door**
  - RESULT **Best spot** +20 meter
    DID YOU KNOW?
    A quiet corner by the door makes it easier to move to outdoor potty later.
    Part B starts.
    LO2
- PLAYER DOES **Drop the pad away from all three spots**
  - RESULT **Pad slides back**
    No message and no change to the meter.
- PLAYER DOES **Do nothing for 15 seconds**
  - RESULT **Idle hint**
    PARENT (IDLE HINT)
    "Dogs like a quiet potty spot, away from where they eat and sleep."
    LO2

DECISION
Part B: read the signs and lead the puppy (two successes needed)

The puppy wanders for a few seconds, then sniffs the floor and circles. A thought bubble shows a droplet. The treat sits on the counter.

PARENT
"Now watch Biscuit closely. Sniffing and circling mean they need to go!"

LO2 LO3

DECISION
The puppy sniffs and circles (12 seconds, counted from OK)

The explanation appears the moment the signs start; the clock starts when it is closed. The first time, a ghost-hand demo shows the move; the ? button replays it. A yellow arrow points at the treat.

PARENT
"Biscuit is sniffing and circling. That means "I need to go!" Drag the treat from the counter to lead them to the pad."

PARENT, SECOND TIME
"Biscuit is sniffing again! Lead them to the pad."

LO2

- PLAYER DOES **Drag the treat and keep holding it so the puppy follows it onto the pad**
  - RESULT **The puppy goes potty on the pad**
    It follows the treat, reaches the pad, pees for a moment, then wags with a treat thought bubble.
    PARENT
    "Biscuit went on the pad! Reward them right away: drop the treat on Biscuit."
    LO2
    - DECISION **Reward right away**
      A demo shows dropping the treat on the puppy (first time). The puppy lights up while the treat is over it.
      LO3
      - PLAYER DOES **Drop the treat on the puppy**
        - RESULT **Reward given** +20 meter
          The puppy eats, wags, and a heart floats up.
          GREAT JOB!
          That's positive reinforcement! Rewarding good behavior right away is a great way to train a dog. Biscuit learns that using the pad means good things happen.
          The card is shown the first time only. The second time the parent says: "Biscuit did it again, and you rewarded them right away. That's how puppies learn!"
          LO3
      - PLAYER DOES **Wait 15 seconds**
        - RESULT **Idle hint**
          PARENT (IDLE HINT)
          "Biscuit went on the pad! Reward them right away: drop the treat on Biscuit."
          LO3
- PLAYER DOES **Let go of the treat too early**
  - RESULT **The treat jumps back to the counter**
    The puppy keeps circling and waits.
    No message. The timer keeps running.
    LO2
- PLAYER DOES **Run out of time, or never reach the pad**
  - RESULT **Another accident**
    The puppy pees where it stands.
    PARENT
    "Oh no, Biscuit had an accident on the rug! What do you do?"
    LO3
    - PLAYER DOES **Scold the puppy**
      - RESULT **Scolded** −5 meter
        The puppy cowers.
        DID YOU KNOW?
        Scolding teaches puppies to hide when they go, not where to go.
        LO3
    - PLAYER DOES **Clean it up calmly**
      - RESULT **Calm clean-up** +10 meter
        The puddle fades away.
        DID YOU KNOW?
        Clean accidents well. Leftover smell makes a puppy go there again.
        LO3

RESULT **Task complete (two successes)**

PARENT
"Biscuit is learning fast!"

DID YOU KNOW?
Puppies often need to go after waking up, eating, and playing.

The "That night" cutscene, then the Day 1 album page.

LO2

Level 2, Task 1: Spot the Difference LO4

Two framed pictures: a healthy dog with the right products, and your dog with the grooming bag from home. Hovering a part lights it up in both. Tapping opens both close-ups side by side. Eight differences, three decoys.

SCENE **Level 2 intro cutscene**

TIME CARD
"One morning"

PARENT
"Biscuit keeps scratching. Let's take them to the vet for a check-up."

PARENT
"Bring Biscuit's grooming bag too. The vet can check what we use at home."

PARENT
"Here we are! Biscuit is a little nervous. Stay close and keep calm."

VET
"Hello, Biscuit! Let's compare you with a healthy dog, and check that grooming bag too."

CTX LO4

DECISION **Start of the task**

The first time, a ghost-hand demo shows the move; the ? button replays it. Meter drain: 0.35 per second.

VET
"On the left is a healthy dog. On the right is Biscuit, with the grooming bag from home. Tap anything to look closer. Can you find 8 differences?"

LO4

PLAYER DOES
Tap the paws, then the difference in the close-up

RESULT **Found: nails** +15 meter

FOUND IT!
Biscuit's nails are too long. Long nails hurt when a dog walks, so trim the tips regularly.

Circled in both close-ups and in the big picture. The counter in the task card goes up.

LO4

PLAYER DOES
Tap the ears, then the difference in the close-up

RESULT **Found: ears** +15 meter

FOUND IT!
Brown wax in the ears! A gentle dog ear cleaner helps, and a weekly check keeps ears healthy.

Circled in both close-ups and in the big picture. The counter in the task card goes up.

LO4

PLAYER DOES
Tap the teeth, then the difference in the close-up

RESULT **Found: teeth** +15 meter

FOUND IT!
Yellow tartar on the teeth. Brushing a few times a week with dog toothpaste keeps teeth and gums healthy.

Circled in both close-ups and in the big picture. The counter in the task card goes up.

LO4

PLAYER DOES
Tap the coat, then the difference in the close-up

RESULT **Found: fleas** +15 meter

FOUND IT!
Fleas! They make dogs itch and can spread illness. Monthly flea prevention keeps them away.

Circled in both close-ups and in the big picture. The counter in the task card goes up.

LO4

PLAYER DOES
Tap the toothpaste, then the difference in the close-up

RESULT **Found: toothpaste** +15 meter

FOUND IT!
That toothpaste is for people. It often has xylitol or fluoride, which are unsafe for dogs to swallow.

Circled in both close-ups and in the big picture. The counter in the task card goes up.

LO4

PLAYER DOES
Tap the shampoo, then the difference in the close-up

RESULT **Found: shampoo** +15 meter

FOUND IT!
That shampoo is for people. A dog's skin is different from ours, so use a shampoo made for dogs.

Circled in both close-ups and in the big picture. The counter in the task card goes up.

LO4

PLAYER DOES
Tap the flea drops, then the difference in the close-up

RESULT **Found: flea** +15 meter

FOUND IT!
Those flea drops are for cats! Flea products are made for one kind of animal, so always match the label.

Circled in both close-ups and in the big picture. The counter in the task card goes up.

LO4

PLAYER DOES
Tap the toy, then the difference in the close-up

RESULT **Found: toy** +15 meter

FOUND IT!
That ball is small enough to swallow, and it could make a dog choke. Choose a toy bigger than its mouth.

Circled in both close-ups and in the big picture. The counter in the task card goes up.

LO4

PLAYER DOES
Tap the eyes (a decoy)

RESULT **They are the same**

VET
"Biscuit's eyes look just like the healthy dog's: bright and clear!"

No change to the meter. Back closes the close-up.

LO4

PLAYER DOES
Tap the tail (a decoy)

RESULT **They are the same**

VET
"Both tails look the same. Fluffy and happy!"

No change to the meter. Back closes the close-up.

LO4

PLAYER DOES
Tap the brush (a decoy)

RESULT **They are the same**

VET
"Both brushes are the same. That brush is just right!"

No change to the meter. Back closes the close-up.

LO4

PLAYER DOES
Tap the wrong place in a close-up

RESULT **A miss** −5 (once per close-up) meter

VET
"Look again: compare both pictures."

VET
"Hmm, not there."

LO4

PLAYER DOES
Do nothing for 25 seconds

RESULT **Idle hint**

VET (IDLE HINT)
"Look closely at Biscuit's paws."

Names a part that is still unfound.

LO4

RESULT **All eight found**

VET
"Great eyes! You found all 8. And now, one last thing for Biscuit: a vaccine."

The vaccine cutscene, then "That evening", then Bath Time.

LO4

SCENE **Vaccine cutscene**

VET
"Biscuit was so brave! Vaccines protect against serious diseases, and only a vet can give them."

TIME CARD
"That evening"

LO4

Level 2, Task 2: Bath Time LO4

Each care item is dragged from the shelf onto the right part of the dog; the dog's problems disappear one by one. The part under the item lights up.

DECISION **Start of the task**

The first time, a ghost-hand demo shows the move; the ? button replays it.

PARENT
"Bath time! Drag each thing from the shelf onto the right part of Biscuit. Teeth, nails and ears come first."

LO4

PLAYER DOES
Drag the dog toothbrush onto the teeth

RESULT **Right place** +15 meter

PARENT
"Dog toothpaste, little circles... bye-bye, tartar!"

The teeth problem disappears from the dog.

LO4

PLAYER DOES
Drag the nail clippers onto the paws

RESULT **Right place** +15 meter

PARENT
"Just the tips, and never too short. Much better!"

The nails problem disappears from the dog.

LO4

PLAYER DOES
Drag the ear cleaner onto the ears

RESULT **Right place** +15 meter

PARENT
"A little cleaner, then a gentle wipe. Clean ears!"

The ears problem disappears from the dog.

LO4

PLAYER DOES
Drag the dog shampoo onto the coat

RESULT **Right place** +15 meter

PARENT
"Now scrub! Rub Biscuit back and forth to make lots of bubbles."

Then rub back and forth until the foam is full (a demo shows how).

LO4

PLAYER DOES
Drag the towel onto the coat

RESULT **Right place** +15 meter

PARENT
"Rub Biscuit dry with the towel."

Then rub the dog dry.

LO4

PLAYER DOES
Drag the flea drops onto the neck

RESULT **Right place** +15 meter

PARENT
"Flea drops go on the back of the neck, where Biscuit can't lick them off."

The fleas problem disappears from the dog.

LO4

PLAYER DOES
Drop an item on the wrong part

RESULT **Wrong part** −5 meter

PARENT
"Not there! The dog toothbrush is for Biscuit's teeth."

LO4

PLAYER DOES
Use something too early

RESULT **Not yet**

PARENT
"Shampoo comes in the tub. Teeth, nails and ears first!"

PARENT
"The towel comes after the bath."

PARENT
"Flea drops go on after the bath, once Biscuit is dry."

PARENT
"We already did that one!"

Teeth, nails and ears on the mat; shampoo in the tub; then the towel; flea drops last, once dry.

RESULT **Task complete**

PARENT
"Teeth, nails and ears are done! Into the tub, Biscuit!"

PARENT
"So many bubbles! A quick rinse, and out you get."

PARENT
"Nice and dry! One last thing before Biscuit goes to play."

PARENT
"Dog shampoo, dog toothpaste, the right flea drops and a big chew toy. Now Biscuit has what they need!"

The Check-up Day album page.

LO4

Level 3: the walk to the park LO3

Hold to walk, let go to stop. Three distractions (a squirrel, a dropped sandwich, a cat). Not a graded task: it introduces leash manners.

SCENE **Level 3 intro cutscene**

TIME CARD
"One sunny morning"

PARENT
"Biscuit is all grown up and full of energy. Let's walk to the park!"

CTX

DECISION **Walking (hold anywhere)**

The first time, a ghost-hand demo shows the move; the ? button replays it. Meter drain: 0.45 per second. No pointer cues and no timed hints in Level 3.

PARENT
"Hold down anywhere to walk. If Biscuit pulls, let go and stop. We only walk when the leash is loose."

LO3

PLAYER DOES
Let go when the dog lunges

RESULT **Good stop** +10 meter

The dog sits and the leash goes loose.

PARENT
"Good stop! Biscuit sat down and the leash is loose. Hold to walk again."

LO3

PLAYER DOES
Keep holding while it pulls

RESULT **Dragged ahead** −5 meter

PARENT
"Let go when Biscuit pulls!"

STOP WHEN THEY PULL
If you keep walking when they pull, they learn that pulling works. Stop, and wait for a loose leash.

LO3

RESULT **At the park gate**

PARENT
"We made it to the park, and the leash stayed loose. Nice walking!"

PARENT
"Here we are! Lots of room to run. Who wants to play fetch?"

CTX

Level 3, Task 1: Fetch & Exercise LO6

Drag the ball back and let go to throw. After 4 fetches the dog pants and slows down; nothing on screen points this out.

DECISION **Playing fetch**

The first time, a ghost-hand demo shows the move; the ? button replays it.

PARENT
"Drag the ball back and let go to throw it. Keep an eye on Biscuit while you play!"

LO6

- **PLAYER DOES** **Throw the ball**
  - **RESULT** **A fetch** — +10 meter
    The dog runs, brings the ball back and drops it. From the fourth fetch it pants; the fifth is slow.
    LO6
- **PLAYER DOES** **Keep throwing while it pants**
  - **RESULT** **The dog flops down** — −5 meter
    It lies down instead of fetching, with a hot thought bubble.
    PARENT
    "Biscuit is too hot to play. Tap the shady tree, then drag the water bowl to Biscuit."
    TIME FOR A REST!
    Panting hard and lying down mean your dog needs rest, shade and water now.
    A demo shows the rest response.
    LO6
- **PLAYER DOES** **Tap the shady tree (once tired)**
  - **RESULT** **Rest in the shade** — +15 meter
    PARENT
    "Good call! Biscuit was panting hard. A rest in the shade helps."
    LO6
- **PLAYER DOES** **Drag the water bowl to the dog (once tired)**
  - **RESULT** **A drink** — +15 meter
    PARENT
    "Fresh water helps Biscuit cool down."
    LO6
- **PLAYER DOES** **Shade or water before it is tired**
  - **RESULT** **Not yet**
    PARENT
    "Biscuit still has lots of energy! Throw the ball a few more times."

RESULT **Rested and watered**

PARENT
"Biscuit is cool and happy again. Great job looking after them!"

HOT DAYS
On hot days, walk in the morning or evening. Test the pavement with the back of your hand: if you can't hold it there for 7 seconds, it's too hot for paws.

The "A little later" card, then Sam arrives.

LO6

Level 3, Task 2: Meeting a new friend LO7

Sam asks to pet the dog. Three steps; in one of two random variants the dog shows stress signals (whale eye, lip licking, yawning, tucked tail) and the right answer changes.

DECISION **Step 1: Sam runs over**

SAM
"Can I pet your dog?!"

PARENT
"Sam is running over! What do you say?"

LO7

- **PLAYER DOES** **Sure, come here!**
  - **RESULT** **Too fast** — −5 meter
    The dog gets nervous.
    PARENT
    "Let's ask Sam to try that again."
    DID YOU KNOW?
    Running at a dog can scare it. Ask people to walk up slowly and calmly.
    LO7
- **PLAYER DOES** **Stop! Walk slowly, please.**
  - **RESULT** **A calm approach** — +15 meter
    SAM
    "Okay! I'll walk slowly."
    DID YOU KNOW?
    Running at a dog can scare it, so a slow, calm walk is best.
    LO7

DECISION

Step 2: read the dog (calm variant: a loose wag)

The question sits top-left so the dog stays in view.

PARENT
"Sam is here. Look at Biscuit. What should happen next?"

LO7

- **PLAYER DOES** **Pet Biscuit right away**
  - **RESULT** **Too soon** — −5 meter
    DID YOU KNOW?
    Petting right away can startle a dog. Let the dog sniff your hand first. A sniff is how dogs say hello.
    LO7
- **PLAYER DOES** **Let Biscuit sniff your hand first**
  - **RESULT** **A sniff hello** — +15 meter
    SAM
    "Hello, Biscuit! Here, sniff my hand."
    DID YOU KNOW?
    A sniff is a dog's way of saying hello. Biscuit is wagging: that means "Nice to meet you!"
    LO7
- **PLAYER DOES** **Not today, Biscuit needs space**
  - **RESULT** **No is always OK, but look again**
    PARENT
    "It's always OK to say no, but look at Biscuit: a loose, wagging tail and a relaxed face. Biscuit is happy to say hello!"
    LO7

DECISION

Step 2: read the dog (stressed variant)

PARENT
"Sam is here. Look at Biscuit. What should happen next?"

LO7

- **PLAYER DOES** **Pet Biscuit right away**
  - **RESULT** **Not now** — −5 meter
    DID YOU KNOW?
    Look at Biscuit: licking lips, yawning, the whites of the eyes showing and a tucked tail. Those mean "I'm uncomfortable". Petting now could go wrong.
    LO7
- **PLAYER DOES** **Let Biscuit sniff your hand first**
  - **RESULT** **Not even a sniff** — −5 meter
    DID YOU KNOW?
    Look at Biscuit: licking lips, yawning, the whites of the eyes showing and a tucked tail. Those mean "I'm uncomfortable". Not even a sniff right now.
    LO7
- **PLAYER DOES** **Not today, Biscuit needs space**
  - **RESULT** **Space** — +15 meter
    SAM
    "Okay! Maybe next time. Bye, Biscuit!"
    BISCUIT NEEDS SPACE
    It's always OK to say no. Lip licking, yawning, whale eye and a tucked tail mean a dog is uncomfortable and needs space.
    LO7

DECISION

Step 3 (calm variant): drag Sam's hand onto the dog

The first time, a ghost-hand demo shows the move; the ? button replays it. The part under the hand lights up.

PARENT
"Now drag Sam's hand onto Biscuit. Where do dogs like to be petted?"

LO7

- **PLAYER DOES** **Over the head**
  - **RESULT** **The dog ducks** — −5 meter
    PARENT
    "Not over the head! Try somewhere else."
    DID YOU KNOW?
    Many dogs don't like a hand coming over their head. The side of the neck or the chest is better.
    LO7
- **PLAYER DOES** **Side of the neck or chest**
  - **RESULT** **A happy dog** — +15 meter
    SAM
    "Biscuit is so soft! Thank you!"
    DID YOU KNOW?
    Biscuit loves a scratch on the chest! Many dogs like that much more than a pat on the head.
    LO7

RESULT **Both sides of the lesson**

BOTH SIDES!
When you meet a dog you don't know, ask the owner first, and let the dog sniff your hand.

Then "That evening", the Park Day album page and the finale.

LO7

Album pages, growth and the finale

LO1 LO2 LO4 LO6 LO7

After each level the player sees what they learned on a photo-album page, then the dog grows up. A "Pawfect!" stamp appears when the whole level had no wrong answer.

SCENE **After Level 1: "Day 1"**

You learned: Safe foods and Potty spot.

LO1 LO2

SCENE **Growth: puppy to young dog**

TIME CARD
"Two months later"

PARENT
"Look how much Biscuit has grown! You're doing a great job."

CTX

SCENE **After Level 2: "Check-up Day"**

You learned: Health check and Grooming.

LO4

SCENE **Growth: young dog to adult**

TIME CARD
"A few months later"

PARENT
"Look how big Biscuit is now! You're doing a great job."

CTX

SCENE **After Level 3: "Park Day"**

You learned: Exercise safely and Safe greetings.

LO6 LO7

SCENE **Finale: "You're a Pawfect Parent!"**

TIME CARD
"That evening"

PARENT
"What a day! Biscuit is all grown up, and so are you. You're a Pawfect Parent!"

An album spread with a photo from each level, then Level select or Back to title.

CTX

Rules that apply everywhere: dialogue, demos, meter, hints, retry and pause

LO1 LO2 LO3 LO4 LO6 LO7

Dialogue boxes block the game until OK. Every new move gets a ghost-hand demo the first time (the ? button replays it). Things that can be tapped or dropped on light up under the pointer. Running out of meter never ends the game: the task restarts.
